*concrete elements machinery*

**MANUFACTURERS**  
SINCE  
1961

**Automatic plants for  
concrete elements production**

made in italy

## Mod. S 120

- The stationary vibro-press SACME (mod. S 120) is the **ideal** option for medium-high **quality** production of concrete elements.
- Developed from an unique experience of 5 decades, SACME vibro-press includes **three types of vibration**, the ideal ones for the concrete products: side, top and bottom vibration.
- The fitting of the **vibrating table** in the vibro-press makes possible the absence of wearing of the pallets and ensures a saving in the dimensions and an almost **unlimited duration** of the pallets.
- The **automatic mode** is simple and reliable; it works with a handling system with “finger-car” and “drying chambers” or with a multi-level system consisting of “multi-level racks” and fork-lifts.
- The following **optional** versions are available:
  - product height: min.60 mm. – max 300/500 mm.
  - dual colour/layer (fully automatic)
  - thermo-block (fully automatic).
- **GENUINELY COST-EFFECTIVE.** The initial costs and the running costs make the SACME vibro-press absolutely worth of being taken into consideration even by the most demanding customer.

### TECHNICAL FEATURES

Dimensions	3.300 x H. 2.100 x 2.150 mm		
Weight	5.570 Kg		
Vibrators:	side	n° 2/4	Kw. 8/11
	upper	n° 2	Kw. 4
	bottom/table	n° 2	Kw. 6
	<b>Total</b>	n° 6/8	Kw. 18/21
Moulding surface:	1270 x 1080 (mm)		
Cycle time:	n° 2 cycles/minute (~)
